## Code Examples in Markdown

Syntax highlighting with [GFM](#)

```
```javascript
function fancyAlert(arg) {
  if(arg) {
    $.facebox({div:'#foo'})
  }
}
```
```

Or, indent your code 4 spaces

Here is a Python code example  
without syntax highlighting:

```
def foo:
    if not bar:
        return true
```

Inline code for comments

I think you should use an  
`<addr>` element here instead.

Something went wrong with that request. Please try again.
